

Blades 2 HF Flex

AQUA LUNG
FIRST TO DIVE

Aqua Lung has again advanced safe and enjoyable diving with the introduction of the Blades 2 Flex fin. The new more flexible fin design is easier to kick, providing a more relaxed dive, while maintaining the same proven blade design as the Blades 2.

With a unique blend of materials that puts more elasticity and snap in the fin's blade, the Blades 2 Flex offers a more flexible fin to suit personal preference. The Blades 2 Flex also features the patented Hands-Free Fin Release Strap for quick removal with just the kick of a heel.
