

Pearl i3 BCDs

seaQuest®

Aqua Lung, the leader in SCUBA diving products, has created their most innovative ladies BC yet, the Pearl i3. Designed for women who demand superior performance, the all new Pearl i3 is both functional and fashionable.

The Pearl i3 incorporates an innovative, new inflation system found exclusively in Sea Quest BCDs. The i3's greatest asset is its simplicity and how intuitive it is to use. Move the lever up to go up: push down to go down. What could be easier? What's more, when dumping air from the BC, the i3 opens all of the new Flat E-Valves at once. Gone are the days of deciding which valve to reach for based upon your orientation in the water.
